Glass and Door Preliminary Measure Sheet

1) If you want to ADD decorative glass to your EXISTING door.

- 1) Measure Door Width
- 2) Measure Panel Width
- 3) Measure Panel Height
- 4) Measure Door Height
- 5) Measure Exposed Glass in Sidelight if applicable

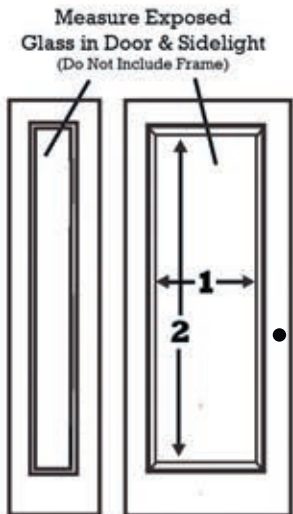

This is the quickest and and least expensive way to improve your entryway from the inside and out, while also increasing the value of your home.

2) If you want to CHANGE the glass in your EXISTING door.

- 1) & 2) Measure the exposed width and height of your existing door glass (do not include the frame)
- 3) Measure the exposed width and height of the exposed sidelight glass if applicable.

Changing the glass in your door is another great way to add privacy while increasing the curb appeal of your home.

3) If you want to replace your entire door.

- 1) Measure the width of your door slab
- 2) Measure the width of the sidelight (if applicable)
- 3) Measure the overall opening height (stucco to stucco)
- 4) Measure the overall opening width (stucco to stucco)
- 5) Measure the width and height of exposed glass in your sidelight if applicable.
